Aroghia

Entry to Senior Level Software Engineers

Description

Develop, design, test, & support web-based applications. Document the development process, implement, maintain and fine-tune applications. Design Pyspark scripts and Airflow DAGS to transform and load the data from HIVE tables in AWS S3 to Datorama. Modify existing software to fix errors, interacting with clients to gather requirements & utilizing knowledge of various tools & frameworks that enable capabilities within the Hadoop ecosystem (AWS, PYSPARK, AIRFLOW, Kafka, Hadoop, HDFS, MapReduce, Apache Pig, Hive, HBase, Sqoop, Flume, HBASE, NoSQL and Oozie), UNIX/Linux including basic commands, shell scripting and system administration / configuration. Must be willing to travel to set up systems to various clients across the nation, perform feasibility studies, and evaluate user requirements.

Please mail resume, cover letter, and salary requirements to Aroghia Group, LLC at 950 Herndon Parkway, Suite# 365, Herndon, VA 20170
